ADHUNIK ENGINEERS	COMPLETE LINE	1988	PUNJAB, INDIA	1 OF 2

What we build

FOUR MACHINES. ONE COMPLETE LINE.

Stage 1

COLD HEADING

Cuts the wire and forms the head in one cycle.

Models	Wire	Up to
7	0.8 to 10 mm	145 pcs/min

Stage 2

TRIMMING

Shears forged heads to hexagon, square and flange shapes.

Models	Dia	Up to
4	4 to 10 mm	100 pcs/min

Stage 2

SLOTTING AND BT CUT

Cuts the slot in the head or the BT notch at the point.

Machines	Dia	Up to
2	2 to 6 mm	90 pcs/min

Stage 3

THREAD ROLLING

Rolls the thread by pressure. No chips, no waste.

Models	Thread	Up to
7	2 to 12 mm	300 pcs/min

A LINE FOR YOUR SCREW SIZE

Screw	Cold heading	Trimming or slotting	Thread rolling
M2 to M3	H-3	Slotting or BT cut	TR-3
M4	H-4 or H-5	Slotting, BT cut or TM-5	TR-4
M5	H-5	TM-5 or slotting	TR-5
M6	H-6 or H-6L	TM-6	TR-6
M8	H-8L	TM-8	TR-8
M10	H-10L	TM-10	TR-10

Our speciality is small screws in M2, M3 and M4. Final models depend on length and head; our team confirms the line with you.

ONE MAKER

Every machine in the line, matched and serviced by one team.

SPARES IN STOCK

Dies, liners, cutters and wear parts kept ready.

VMC, CMC AND HMC

Fully automated production in our own plants.

ON TIME

Dispatch dates agreed up front and kept.
